Accounting for Supermarkets & Grocery Stores

"Running a supermarket or grocery store is challenging with extended trading hours, hundreds if not thousands of stock lines and the need to micro manage prices and profit margins. Success requires a lot of planning and we can help you in all areas of financial management including budgets and financial modelling so you can prepare various 'what if' calculations and cashflow outcomes." **Linda McGowan CPA**

Running a supermarket can involve managing potentially thousands of different lines of stock including a mixture of wet and dry goods. Carrying too much stock or slow moving perishable items can be financially crippling and you also need to manage staff, suppliers and customer complaints. It's a complex business and with over 20 years supermarket, retail grocery and fruit shop experience you can benefit from our industry knowledge.

We understand the fundamentals of a successful supermarket business and can help you monitor key performance indicators. We also use industry benchmarks to compare your supermarkets financial performance against your industry peers. This gives us an indication of what is working in your business and what areas still need working on. We urge our supermarket and grocery store clients to 'know their numbers' including profit margins, average customer sales figures, your stock turn and weekly departmental sales. Software selection and systems is critical so you can dissect your sales by individual departments including meats and seafood, bakery, fruit and vegetables, frozen foods, breads, alcohol, tobacco, dairy and various canned and boxed foods.

Accounting for Supermarkets & Grocery Stores

"We are business advisors and profit builders who offer you strategies to grow your supermarket profits and your personal wealth. We see the tax return as the start of the client process not then end and if you're a supermarket, grocery store or fruit shop owner looking to start, buy or grow your business contact us today on (03) 9383 2700."
